

## **SEANET TECHNOLOGIES' SEAVIEW RTM™ 3.0 CHOSEN BY NYSE EURONEXT FOR LATENCY MEASUREMENT**

*NYSE Euronext Will Implement SeaView RTM to Measure Application  
Performance*

**NEW YORK – June 15, 2009** – SeaNet Technologies ([www.seanet-tech.com](http://www.seanet-tech.com)), a leading worldwide provider of application performance measurement and reporting solutions, today announced that NYSE Euronext has chosen its SeaView RTM 3.0 to expand latency measurement in the organization's applications. NYSE Euronext, which offers a diverse array of financial products and services, chose SeaView for its level of accuracy in measuring the latency in financial applications.

NYSE Euronext will implement SeaView, which was specifically developed to address the unique requirements of financial services firms, to measure the latency performance of its market data and trading applications. "SeaNet's solution is a hardware-based latency monitoring system that can be used for arbitrary network traffic without negatively impacting the system being monitored.

"NYSE Euronext is committed to offering a global marketplace with maximum liquidity, the best price and the fastest execution times possible," said Lisa Cannizzaro, Technical Director, NYSE Euronext. "Central to this commitment is being able to measure latency in microseconds. We are putting tight controls around latency in every possible way" Cannizzaro said.

"We are pleased that SeaView RTM has been chosen by NYSE Euronext for application performance and latency measurement," said Raymond Marra, EVP, SeaNet Technologies. "This partnership, and our continued expansion into the worldwide market, is further proof that SeaNet is the leader in providing real-world solutions for the financial problems caused by application and network latency," Marra said

SeaNet is dedicated to helping financial services organizations get the best possible performance out of their applications. The company was the first to recognize the root causes of poor performance in mission-critical trading and market data applications by presenting a granular and comprehensive view of the end-user and revealing clear solutions for improving infrastructure investments. The company bridges the divide between real and perceived service levels and the

separation between business and IT domains to create a common solution for delivering the best possible service.

**About SeaNet Technologies, Inc.**

SeaNet Technologies Inc., headquartered in Kew Gardens, N.Y., is the worldwide leader in application performance monitoring and data analysis solutions. The SeaView Latency Measurement Solution delivers the ability to measure, monitor, and analyze the key metrics of actual market data transactions in real-time. SeaNet is the first company to actually deliver on the business requirement to understand the root causes of performance problems with mission-critical trade plant applications.
